

PM Citu: IMM Invest programme has been extended; it includes Agro Invest programme for farmers

On Wednesday, the Government approved the extension of the IMM Invest [for SMEs] programme for 2021, which also includes the Agro Invest programme designed for farmers, with a ceiling of one billion lei.

"At its meeting today, the government approved the IMM Invest programme, the extension for 2021, which also includes the Agro Invest programme especially designed for farmers. Last year, when we implemented IMM Invest, there were several problems and we saw the need to create a programme to be especially designed for farmers, with a ceiling of one billion lei. I understand that the amount is almost entirely covered by the applications so far, the same as in the case of IMM Invest, which means that we are talking about a successful programme, and we will take care to supplement that amount," Florin Citu told a press conference held at the Victoria Palace.
